READY ▶ RELIEF ▶ RESTORE

Stock supplies to last at least 72 hours.

READY TIPS

THE DURACELL READY KIT

BUILD A KIT

Focus on the essentials – the things you need every day – and stock your kit with enough of those items to get you through 72 hours.

Prepare two kits: one for you and your family, and one for your pets (if applicable).

It's also important to check your kits on a regular basis to make sure food and medications haven't expired. (approx. every 6 months)

MAKE A PLAN

In the chaos of disaster, a thorough plan of action can make all the difference. Here are a few considerations when creating your emergency strategy:

- Draft an evacuation route – *how you'll safely exit your home and/or take shelter.*
- Designate a set meeting spot – *where you'll assemble.*
- Create a contact list – *who you'll reach out to if you and your family are separated.*
- Store your contact list and ready kit – *where you can easily access them in the event of an emergency.* (Example: Place them in a closet near the front/back door of your home or in the garage. Just make sure every member of your household can reach them.)
- Know school and employer emergency plans – *how they'll communicate with you about family members.*

BE INFORMED

Stay informed about what types of disasters may affect your region. Be aware of your local emergency contacts and news outlets so you can have up-to-the minute information on what's happening and better react to emergency situations.
